Type of meeting

technical training

Short summary:

Technical training was organized in two parts. First we visited heating boiler that runs on wood chips. Boiler power is 1,6 MW and it is producing heat for the needs of the Promming factory. At the site we saw woodchipper in action. Second destination was factory Centrometal near bay that is producing all kind of boilers but also the ones that run on biomass. Technical training was organized in the most northern part of Croatia near border with Hungary and Slovenia.

Second part of the training was consisted of four presentations:

1. Biomass district heating - Velimir Šegon, REGEA
2. Biomass boilers - Marko Grđan, Centrometal
3. New EU norms for solid biofuels - Blaž Štefanek, FES
4. Activities of Environmental protection and energy efficiency Fund regarding biomass projects - Mario Mihetec, FZOEU
